SUMMARY

I design Salesforce queues and DocuSign workflows that cut advisor packet review from 60 minutes to 20.

PROFESSIONAL EXPERIENCE

Wealth Operations Specialist | Signal Advisors

Detroit, MI | 06/2026 – 09/2026

- Fixed a Salesforce queue collision between trading and service desks, preventing 10 critical SLA breaches.
- Cleaned multi-source CRM records into a single pipeline view to remove duplicate contact entries.
- Documented end-to-end service desk workflows to standardize how operations analysts handle ticket queues.

Operations Consultant | 40 Acres

Detroit, MI | 04/2026 – 05/2026

- Drafted SEC Form D and Regulation Crowdfunding filings for digital asset and private real estate offerings.
- Set up compliance intake checkpoints and suitability reviews for incoming platform investors.
- Reviewed property documentation and title records to ensure custodial data parity across active offerings.

Financial Planning Intern | Northwestern Mutual

Grand Rapids, MI | 05/2025 – 08/2025

- Prepared financial planning proposals and led 15+ prospecting reviews under RIA suitability guidelines.
- Engaged with institutional custodians to verify prospective client financial profiles and expedite account transfer paperwork.
- Tracked onboarding paperwork exceptions across prospective client files to resolve documentation hold-ups with partner firms.

Total Rewards Finance Intern | ABC Technologies

Southfield, MI | 05/2024 – 08/2024

- Reconciled employee 401(k) and healthcare deduction variances across 500+ accounts in bSwift and Excel.
 - Built structured audit checklists to cross-reference multi-plant payroll data, catching recurring 401(k) deduction errors across 70+ manufacturing facilities.
 - Prepared and maintained supporting schedules for variance analysis and recurring internal financial reports.
-

TECHNICAL PROJECTS

Document Automation Pipeline & Custom CRM | Source

Detroit, MI | 07/2026 – 08/2026

- Built a Python and Flask backend with SQLite to track pipeline records and sync live status updates over webhooks.
- Integrated the Gemini API to screen inbound records against a structured content bank and compile tailored 1-page PDFs on demand using Typst.
- Designed the screening layer as a deterministic template engine, so the model routes and scores while every output line comes from banked copy rather than generated text.

Crypto Breakout Alert and Real Time Paper Trading Engine | Source

Detroit, MI | 04/2026 – 08/2026

- Built a concurrent Python backend on SQLite in WAL mode with explicit write locks to process live exchange data and manage virtual portfolios.
 - Engineered a real time WebSocket reconciliation feed and historical backtester for automated breakout detection and simulated execution.
-

EDUCATION & CREDENTIALS

B.A. Business (Finance), B.A. Political Science, Hope College

Holland, MI | 08/2022 – 05/2026

Certificates & Licenses: Series 65 (Expected Q4 2026), Securities Industry Essentials (SIE), Schwab Limited Power of Attorney, Bloomberg Market Concepts
